New JFK Assassination Film Reported

DENVER — A previously undisclosed film of the assassination of President John Kennedy has surfaced in Dallas, and has been provided to authorities, The Denver Post reports.

The Post said those who have viewed the 8mm color film report it offered a clear view of the grassy knoll in Dealey Plaza in Dallas, where some investigators have theorized a second gunman may have fired at Kennedy on Nov. 22, 1963.

The Post said the recently rediscovered film was shot by Dallas resident Jack Daniels. John Sigalos, a Dallas attorney representing Daniels, said the film was given to the Assassinations Committee three days before it disbanded, the newspaper said.
